

hs38

Designed to protect domestic plumbing systems against limescale build up. The HydroFLOW hs38 is suitable for houses of up to four bedrooms, and for combination boilers as well as vented and unvented cylinders.

The hs38 is designed to protect against hard limescale deposits in domestic pipelines and on heating elements and surfaces, to protect appliances such as dishwashers and washing machines, and to make limescale-stained taps, sinks and bathtubs easier to clean.

Ø UP TO 38MM

- New Limescale
- Existing limescale
- Suitable for the average two to four-bedroom sized home
- Fits on pipe size up to 38mm outside diameter
