## **k40 AQUAKLEAR**

The k40 is designed to improve the water quality of pools, hot tubs, spas, water features, and other related applications. Reducing bacterial levels and improving filtration in pools etc. leads to clearer and more pleasant water and a reduction in maintenance regimes and associated costs and a reduction in backwash.

The k40 has a range of benefits designed to make your system cheaper and easier to maintain, and more pleasant to use.

 UP TO 63MM

- Water Quality
- Chlorine Reduction
- Small pools and spas
- Fits on pipe size up to 63mm outside diameter
