

## ***p* AQUAKLEAR**

Designed to improve water quality in both swimming pools and cooling towers. Flocculating material improves filtration and reduces backwashing, leading to lower energy usage, water and effluent charges, and (in pools) also reduces chloramine levels and the associated smell. Preventing and removing limescale on heat exchangers and the tower itself can reduce maintenance costs and improve their overall efficiency.

 UP TO 200MM

- Improved Filtration
- Biofouling Control
- Suitable for commercial pools and cooling towers
- Standard units available for pipes up to 200mm in outside diameter
